SUPPLEMENTARY CATALOGUE

"MAGIC NOTES"

COLUMBIA NEW PROCESS RECORDS

The Columbia New Process Record is known to manufacturers, dealers, and the buying public, as a record of remarkable playing qualities, with a smooth, silent surface, as well as a record of great strength and durability. It is called "the record without a scratch."

The superiority of the surface of the Columbia New Process Record not only is apparent to the ear of the listener, but is easily explained scientifically. Columbia New Process Records are made by the "laminated process," or "new process," which is protected by patent, owned by the Columbia Phonograph Company.

The ordinary phonograph record is made of what is known as "solid stock." This means that the interior is composed of exactly the same material as the surface. The expensive ingredients, of which shellac is the most important, are mixed through the entire record. By the laminated process, the shellac and other costly materials, that are vital to the playing qualities of the record, are concentrated on that playing surface.

The core of the laminated record is made of a substance, which, while comparatively inexpensive, is of great strength. This reduces the possibility of breakage to a minimum. Upon each side of the core is pressed a sheet of especially prepared paper, which is coated with gum. Before this gum is dry, a sprinkler deposits the shellac and other ingredients upon the gummed surface of the paper, and thus *concentrates the surface materials upon the surface of the record*. The sheets of paper also prevent the fibrous materials, mixed throughout the "solid stock" record and contained in what becomes the core of the laminated record, from working to the surface. But for the papers, minute particles would raise above the impressed record surface and impart to the reproducing surface a constant hissing which is termed "surface noise."

**Columbia New Process Records are recorded the new way—
*electrically, Viva-tonal Recording***

COLUMBIA SUPPLEMENTARY RECORD CATALOGUE 1931

In this new supplementary catalogue there is continued the style of arrangement which has proved so satisfactory to our patrons during the past two years. This arrangement is alphabetical throughout. It lists each double disc record, containing two separate selections, first, alphabetically under the title of the first selection, as:

{	St. Louis Blues—Fox Trot		50256D		12		1.25
	Guy Lombardo and His Royal Canadians						
	Stephen Foster Medley—Fox Trot						
	Guy Lombardo and His Royal Canadians						

next, alphabetically under the title of the opposite side:

{	Stephen Foster Medley—Fox Trot		50256D		12		1.25
	Guy Lombardo and His Royal Canadians						
	St. Louis Blues—Fox Trot						
	Guy Lombardo and His Royal Canadians						

and again alphabetically under the name of the artist, as:

LOMBARDO, GUY, AND HIS ROYAL CANADIANS (*Exclusive Columbia Artists*)

St. Louis Blues 50256D | Stephen Foster Medley 50256D |

Where necessary, as in the case of the above record, there is a further alphabetical reference under Foster, Stephen, Medley.

There are also numerous convenient classifying references, such as: Piano Records, Sacred Selections, Dance Records, Popular Songs of the Past Year, and many others, facilitating the location of any desired record or type of recording.

Following the alphabetical catalogue is the tinted section listing in detail the additions to the famous Columbia Masterworks Series and recordings by celebrities of opera and concert, also the new works issued in the Columbia Operatic Series—operas in serial form, in albums.

At the end is a reference list of serious composers, followed by a page devoted to the Columbia Viva-tonal Portable Phonograph, Model 163, the most convenient and successful portable reproducing instrument ever sold in America—"Like life itself."

Note—All records listed in this catalogue are electrically recorded, except that the numerical review of Columbia Musical Masterworks, appearing on pages 146 to 149, being a complete listing of all sets in this series, includes mechanically recorded Sets Nos. 6 to 31 inclusive and Sets Nos. 33 and 35, issued previous to 1928.

MASTERWORKS†

(Columbia Fine-Art Series of Musical Masterworks)

The Columbia Masterworks Series forms the greatest resource of the better music on records ever in existence. Passing its 150th album issue in 1930, it constitutes, with the many shorter works not in albums, an inexhaustible mine of musical treasure for entertainment, appreciation and study. Every really great composer from J. S. Bach to Igor Stravinsky is represented, in works which form the mainstay of the world's concert repertory. New additions, representative of all that is worth while in classic and modern musical literature, are made monthly. All works in five or more parts are enclosed in permanent art albums. The great majority are complete with exception of conventional repetitions. Album sets added during the past fifteen months are listed on this page and the page following. For detailed information see pages 150 to 161, tinted section.

ALBENIZ

Iberia: Suite for Orchestra—6 parts—Set No. 130—\$4.50 with album.
Enrique Fernandez Arbos and Madrid Symphony Orchestra

Important Notice

All Columbia Records are recorded at seventy-eight revolutions to the minute. Perfect results in reproduction can be assured only by playing them at the same speed. The best method of determining such speed is to place a piece of white paper under the edge of a record on the turntable of the instrument and count the revolutions against the minute hand of a watch, making such adjustment of the speed indicator as may be necessary.

COLUMBIA MASTERWORKS^{*} AND CELEBRITY RECORDS

Issued Since 1930 Supplementary Catalogue

	Pages
1. Columbia Fine Art Series of Musical Masterworks.....	145-161
2. Columbia Operatic Series.....	162
3. Columbia Celebrity Records.....	163-173
4. Composers' Index.....	174-175

The Columbia Masterworks Series forms the greatest resource of the better music on records ever in existence. Passing its 150th album issue in 1930, it constitutes, with the many shorter works not in albums, an inexhaustible mine of musical treasure for entertainment, appreciation and study. Every really great composer from J. S. Bach to Igor Stravinsky is represented, in works which form the mainstay of the world's concert repertory. New additions, representative of all that is worth while in classic and modern musical literature, are made monthly. All works in five or more parts are enclosed in permanent art albums. The great majority are complete with exception of conventional repetitions.

Additions of the past fifteen months are listed in the following pages. Ask also for Columbia Masterworks Catalogue and Columbia 1930 Supplementary Catalogue.

NOTE—Many of the records in the succeeding pages devoted to the Columbia Fine-Art Series of Musical Masterworks were recorded in Europe by Columbia Graphophone Company, Ltd., and associated Companies, matrices being imported into this country by Columbia Phonograph Company, Inc. All such records listed here are manufactured in America.

- ZIMBALIST, Efrem** See: Improvisation on a Japanese Tune

COLUMBIA VIVA-TONAL PORTABLE

"like life itself"

MODEL NO. 163

It is the vogue, these days, in every home, to have a handsome portable phonograph. In the larger homes this portable is in addition to a cabinet or a combination instrument. In the smaller homes or apartments, where space is at a premium, a beautiful portable, such as the Columbia Viva-tonal illustrated above, takes the place of the larger instruments.

If you have yet to hear a Columbia Portable, prepare for a very great surprise. In brilliance of tone, volume, and fidelity of reproduction of voice or instrument, the Columbia Viva-tonal Model 163, rivals the larger and much more expensive models. Symphonies, operas, dance numbers or popular vocal selections are brought to you exactly "like life itself."

This portable, constructed of the finest material throughout, is built for a lifetime of service. The entire surface, as well as the inside of the lid, is covered with water-proof, durable Fabrikoid, making the model 163 especially suitable for the rough usage of travel by land or sea. Yet its gray baby alligator cover and brass metal parts blend harmoniously with the color schemes of the home, the club, or the student's room.

Columbia Needles

Three types of Columbia Steel Needles—Soft, Medium, and Loud—provide all the variation of tonal quantity and quality necessary for playing any good record, particularly the Columbia New Process Record, upon any good phonograph under ordinary circumstances. This should be borne in mind when playing the Viva-tonal Columbia. So perfectly does the Viva-tonal Columbia reproduce all sounds, from the highest treble to the deepest bass, that the use of such needle types as “Extra Loud” and “Fibre” detracts from, rather than adds to, the faithfulness and brilliancy of reproduction.

Columbia Needles, Columbia New Process Records, and the Viva-tonal Columbia, or the Columbia Electric Reproducing Phonograph and Radio Combination, set at seventy-eight revolutions per minute, combine to produce the perfect reproduction. Each is made for the other. Together, they are made for you.
